Product Introduction

1.1 Product Overview

The rugged D82 Dual-COM(Data Terminal Unit) which is a cellular modem have been developed especially for M2M application. It provides one RS232 and one RS-485 interfaces, three DI and one DO ports as default, and equipped with PPP, TCP/IP protocol, it could convert the user data into 4G/3G/2G network and transmits the data to the customer's data service center through complete transparent data channel, allows a simple and rapid integration of cellular network connectivity into M2M application.

With the robust, reliable, long life and compact metal case design, the D82 ideally adapts to onboard standard, easy to deploy and maintenance, it has been widely applied in many fields worldwide, such as power SCADA, oil field, coal mine, weather forecast, environment protection, water conservancy, heating, natural gas, petroleum and so on.

1.2 Typical Application Diagram

WLINK 4G/3G/2G D82 widely used in AMR, Oil, transportation, power grid, mining and other industries fields.

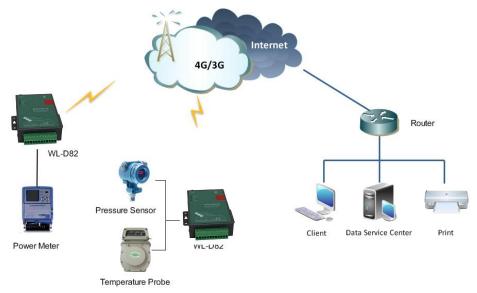

Figure 1-1 Network Topology

1.3 Features

- Various cellular module optional, 4G/3G/2G optional
- Optimized EMC design
- Standard PPP, TCP/IP and UDP/IP protocol
- Industrial pluggable terminal block
- Industrial 4G/3G/2G wireless module
- Support One RS232 and one RS485 ports as default
- Support 2 DI and 2 DO ports
- Support APN and VPDN wireless private network
- Support short message service (SMS)
- Support transparent data transmission
- Support data service center with dynamic IP address
- Support LED status indication
- Wide range voltage input
- Smart power management
- External power on/off control
- Reliable, flexible and easy to deploy

2 Hardware Installation

This chapter is mainly for installation introduction, there would be some difference between the scheme and real object. But the difference doesn't have any influence to products performance.

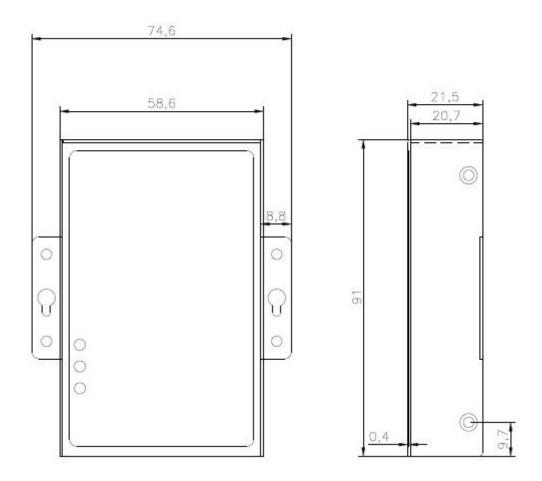

2.1 LED Status

LED indicator Status

Silk-screen	Status	Indication
	Light Off	CSQ<12, no signal or weak signal
Signal	Blinking	13 <csq<22, common="" csq<="" td=""></csq<22,>
	Constant Light	23 <csq<31, good="" signal<="" td=""></csq<31,>
Net	Light on 2s,Light off 1s	Standby
	Light on 1s, Light off 2s	Online
	Blinking	Self-checking
Power	Constant Light	D82 system running

2.2 Dimension

2.3 How to Install

2.3.1 SIM/UIM card installation

Open SIM shelter by screw-driver, then insert SIM/UIM card.

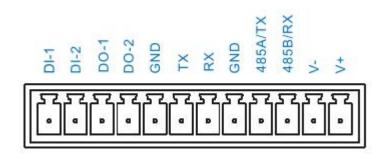

Before connecting, please disconnect any power resource of D82

2.3.2 Interface Panel

Pin	Interface	Description
1	V+	Power Vin+, Anti reverse
2	V-	Power Vin-, Anti reverse
3	RS484 B	RS485 B, 57600bps as default
4	RS485 A	RS485 A RX, 57600bps as default
5	GND	GND for serial port communication
6	ТХ	RS232 TX, 57600bps as default
7	RX	RS232 RX, 57600bps as default
8	GND	GND for serial port communication
9	DO2	Digital Output, 0~3.3V
10	D01	Digital Output(0~+5V), Dry Contact

Shenzhen Wlink Technology Co., LTD 深圳市徳传物联技术有限公司

D82 Dual-COM Modem User Manual

11	DI2	Digital Output(0~+5V), Dry Contact
12	DI1	Digital Output(0~+5V), Dry Contact

2.3.4 Power Supply

In order to get high reliability, adapt wide voltage input: +7.5V \sim +32VDC, support hot plug and complex application environment.

2.3.5 Review

After insert the SIM/UIM card, connect serial cable, necessary antenna, then connect power cable.

Please connect the antenna before connect the power cable, otherwise because of impedance mismatching, the signal maybe poor.

Notice:

- Step 1 Check antenna connection.
- Step 2 Check SIM/UIM card, configure SIM/UIM card is available.
- Step 3 Power on D82.

3.1 Serial Port Settings

Run D82 Dual-COM Conf Tool and select serial port, then setup serial port parameters in the bottom of Config Tool as below.

Cellular	Cellular setting			
cellului	APN cmnet			
ial Setting	Username			
ta Cantar	Password			
ata Center	PING			
Protocol	IP Address 0.0.0.0	Connection Setup		×
) Setting	Domain	Port COM:	3 🔹	
	Interval 0 0~	55 Baud Rate 5760	0 💽	
ork Mode	DNS Setting	Data Bit 8		
Manage	Primary DNS 0.0.0.0	Parity Bit None Stop Bit 1		
Jpgrade	PIN Setting	Switch cmd	++	
oduct Info	S Config Connect	Dis:	X Cancel	ult 🛛 🖓 Read 🖉 S

Run Config Tool, click Config button to setup serial port parameters as below.

Baud Rate: 57600bps Data Bit: 8bit Parity: None Stop Bit: 1bit

Click Connect button, modem will be connected to the tool and enter configuration mode. If the connection is successful, it will display Connected dialog box as below.

D8	2 Dual-COM Conf Tool	
a Cellular	Cellular setting APN cmnet Username Password	^
 Data Center Protocol IO Setting Work Mode 	PING IP Address 0.0.0.0 Domain Interval 0 0~255 mins

【Config】 Tool Serial port configuration.

【Connect】Connect D82.

【Disconnect】 Close serial port to leave configuration mode.

[Import] Import configuration file into Config tool.

[Export] Export current settings to file. It's convenient for butch setup.

[Factory Default **]** Setup D82 to default settings.

【Read】 Inquiry current D82 setting.

[Save] Save settings to D82.

COM1 settings instruction.

Parameters	Description	Instruction	Default
Baud rate	Serial port properties	300/600/1200/2400/4800/9600/19200/384 00/57600/115200 optional. RS232 Port for 115200bps as default. RS485 Port for 115200bps as default.	
Data bits		8	8
Stop bits		1/2	1

Parameters	Description	Instruction	Default
Parity		NULL/ODD/EVEN	NULL
Protocol	Transmission protocol between D82 and device. Under command mode, terminal might setup D82 configuration.	Transparent and Command modem are optional. The default is for transparent protocol.	Transparent
Max Package Length	The max transmission unit. Once data package length exceeds to MTU, D82 will split data package as MTU.	1~1024bytes	1024bytes
Min Internal	The Min Interval is the waiting time interval for transmitting the data package that is less the MTU. If the last package equals to the MTU, D82 will transmit it immediately.	100~1000ms	300ms
